

M95 - Accessories

M95 - NBC Military Gas Mask

The M95 Military NBC respirator embodies the highest efficiency levels & comfort in modern NBC protection & meets the most critical hazards & stresses encountered in combat.

OUTSTANDING PROTECTION

Anatomical accuracy means that the close fit of the M95 mask offers unmatched protection. Nominal protection factor is >10 000. The high-efficiency NBC filter protects against all known chemical and biological agents as well as radioactive and toxic particles.

DESIGN FEATURES

- Extremely wide field of vision - due to the close mask fit.
- Excellent fit & user comfort resulting from computer-aided design (CAD).
- Anatomical accuracy of the design based on a wealth of facial-form data.
- Standard 40mm filters may be mounted on either side.
- Hoseless, leakproof drinking device, intake of liquid 250 ml/min.
- 6 point head harness which allows for maximum comfort.
- Mask has a twenty year shelf life, M95 Filter has a 10 year shelf life.
- Spectacle frames for prescription lenses. (optional accessory, see below)

WEARER ACCEPTABILITY

Due to extremely low breathing-resistance, the M95 mask & filter are comfortable to wear even for long periods, without affecting user performance. Light in weight: the mask weighs less than 500g, 720g with filter. The small inner mask reduces the dead-space to a minimum and the respirator is easy to don & doff (Donning test: 10 sec.). Thanks to its slimline design, the M95 is compatible with tactical equipment used in field operations, e.g. optical & communication devices, weapons, protective clothing & more.

HIGH-QUALITY MATERIALS FOR MAXIMUM PROTECTION

Halo-butyl rubber used for the face piece is specially engineered to enhance resistance to all known chemical and biological warfare agents. The silicone inner mask provides comfortable fit and a long storage life. Weight: 1.02 lbs (0.47 kg) (Mask Only)
