

De·Fend[®]

EMERGENCY DECONTAMINATION SHOWER

The Defend Emergency Decontamination Shower is designed to provide decontamination facilities in accordance with OSHA standard 1910.120 without distracting emergency responders from their primary task.

fend·all[®]

EMERGENCY DECONTAMINATION SHOWER

Ideal for a variety of locations, including construction sites, loading docks, agricultural locations and other emergency response areas.

Lightweight, compact shower and retention pool require no assembly.

Pool and shower can be stored in convenient carrying bags on virtually any response vehicle. Each requires less than 5 cu. ft. of space.

Pool and shower can be made fully operational in less than two minutes by one person.

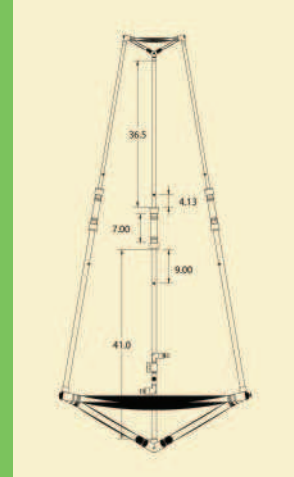

No tools are required for set-up.

Quick deployment; shower is fully erect and operational within ten seconds of turning on water.

The shower will accommodate emergency responder in full chemical gear with SCBA.

The shower is 8' in height and has a 4' diameter at the base.

It is equipped with a 3/4" female garden hose thread.

Seven full-cone, wide-angle nozzles provide a spray pattern with full coverage from all directions.

Four gallon per minute flow rate at 40 PSI assures users of thorough decontamination with copious amounts of water.

The retention pool is 48" x 48" with a depth of 14-1/2". Capacity is 120 gallons.

Patent No.
